Canadian Payroll

## Integration

- SAMCO's *Canadian Payroll* module can be run stand alone or interfaced with other Power Accounting Series applications; including Time and Attendance, Job Cost, Bank Reconciliation, General Ledger, Custom Labels, and Report Writer
- Able to run on a number of platforms including Windows, Windows NT/2000/XP, Novell Netware, SCO Unix / Linux / UnixWare, Red Hat Linux, IBM's AIX, HP/UX, MAC OS X, and Sun Solaris.

## More Features & Benefits

- Process shift differentials; Canada Savings Bonds; RSPs; union dues; stock purchases; savings plans; and taxable benefits
- Track payroll for multiple unions, departments, cash advances, employee receivables, and employees working in more than one department
- Utilize almost unlimited number of earning, deduction and fringe benefit categories
- Continue processing payroll at Year End via the *roll over* feature allowing T4 and T4A generation without interruption to the normal payroll cycle
- Define up to 9999 different departments, groups, and occupations
- Distribute to a specific job / sub-job when linked to Job Cost module
- Create automatic GL interface entries
