

# Power Accounting

From Samco Software Inc.

## Product Overview

With over 20 standard modules and dozens of add-ons to choose from, Samco's Power Accounting System is one of the most comprehensive suite of business management applications on the market today. Its modular design allows you to start off with as many or as few components as required, and then build on your investment as your needs grow. Plus it's available for most of today's major computing platforms; including DOS, Windows, Windows NT Workstation and Advanced Server, Novell Netware, SCO Unix and Open Server, IBM's AIX, HP/UX, Sun Solaris, and UnixWare.

## Common Features

- *Designed for Single and Multi-User Environments*
- *Powerful windowing features to access the information you need*
- *On-line Documentation*
- *Ultrafast File System*
- *Supports a wide variety of operating systems*

- Multi-company support allows you to set up over 1000 different sets of data files.
- Built in multi-user support is reflected in the ability to individually set up users and workstations within the Samco system. Each user can have their preferred menu style, default printer, default workstation, preferred color scheme, and whether they use a screen saver or not.
- Individual workstations can be set up to handle unique report name, tax registration number, invoice numbers, and order numbers.
- Field level locking means no more waiting for records in use by other users.
- Total password protection locks users out of sensitive data and functions that they do not need access to.
- On-line user manuals for all modules gives you easy access to the information you are looking for.
- Consistent keystrokes, screen layouts, and functionality from one module to the next reduces the learning curve.
- Within most table driven fields, you can bring up a list of available selections simply by pressing the "?" key.
- Look up windows allow you to zoom in on customer, item, vendor, employee, and G/L account details at any time.
- Built in calculator feature with 6 memory slots, running tape, and paste functionality.
- Notepads allow you to keep up to 99 pages of free form information on customers, vendors, items, and G/L accounts.
- Phonebook utility allows you to quickly look up names, addresses and phone numbers for customers and vendors. You can even add your own commonly used phone numbers, and print mailing labels.
- Send electronic mail right from within any Samco application with the messaging feature.
- Five different menu styles to select from with the option to set a preferred menu style for each user.

---

## More Common Features

- Tight integration between modules eliminates duplicate entry and ensures the accuracy of the information.
- Extensive and accurate audit trails are kept for all financial activity. Every distribution to General Ledger can be directly traced to its original entry, and each report is assigned a unique number and reference showing its source. Features accountants and CFO's definitely appreciate.
- View user activity to see who is doing what within the system.
- Built in screen saver option protects your hardware investment.
- Support is provided for local (at a users workstation) and system wide printers.
- Report mirroring ensures your audit reports are not lost due to a printer failure.
- All non audit reports can be printed either to disk, to screen, or to one of over 99 different printers.
- Enhanced printer set up allows to configure all types of printers; including dot matrix, laser, and inkjet.
- Advanced file utilities can be used to export, import, and rebuild your data files.
- High performance file system designed for large data storage.

---
