

## eSamco

There is no doubt that the Internet has spawned a technological revolution and is changing the way business is done. Everywhere we hear about e-commerce this, Java that, and XML the other. That's all fine and dandy but the average SMB (small/medium) business still wants to know how they can get in on this revolution without breaking the bank.

Enter **eSamco** for Samco's Power Accounting system. With **eSamco** you'll have the power to link the massive resource you have with your Samco Power Accounting system via the Internet.

**eSamco** acts as the ultimate customer service rep. It equips your customers whom you have made Members (have a login and a password) to:

- Call up current pricing and item availability
- Scale down item searches to prices on contract or on sale.
- Display real live pricing based on the customer's set up .
- Place orders on line – on account or pay via credit card, and create the order immediately in your Samco Order Entry system, all ready to ship and invoice.
- Check the status of current orders and see what they have on order, where it's being shipped, and when it is being shipped.
- Find out purchase history of inventory items.
- Review A/R open item history with full drill down to invoice detail and item purchase history.

You have many options, including having the system recognize a member logging in from the U.S. versus from Canada, for different price points. You can decide what you show, whom you show it to and how you show it.

For those of you with remotely hosted websites we can simply add a link to your eSamco site which draws information live from your Samco Power Accounting system. If you do not currently have a web site, Samco can create one for you, designed especially for your Company and we will host it for you also.

All of this, for a reasonable up front fee and a monthly hosting fee. You decide how much or how little you want .

Suite 61 . 7789 134 Street . Surrey . BC Canada . V3W 9E9
