

*Global/DX* is a multi-faceted enhancement module for Samco's Power Accounting System that provides extensions for:

- **EDI....** Extensive EDI enhancements for handling inbound and outbound documents with most EDI translation packages; supporting a wide range of document types.  
(Professional Edition only)
- **Data Collecting....** Importing of data from data collection devices, portable computers, vendor pricing files, and other third party software applications.
- **Third Party Application Integration....** Exporting of data for sending to remote sales reps, customers (i.e. price lists), and third party application software.

*Global/DX Lite* is comprised of the data collecting and third party application integration tools only and is upgradeable to the Professional Edition with EDI features.

Requires other Samco Power Accounting modules and an operating system dependent *Installation Kit*.
