

# Report Writer

From Samco Software Inc.

---

## Product Overview

The entire Samco Power Accounting applications family is feature rich and loaded with effective reporting functionality. If you should find that you need a little bit more in the way of reporting or require a method for exporting data to or from the Samco Power Accounting system, Report Writer will fill this need.

Basically Report Writer acts as a mediator between your Samco data and you. With predefined file layouts already provided, all you have to do is prepare the output by telling the system what you want and where you want it.

Report Writer can be used to develop complex queries from multiple files, or prepare a simple listing of customers with only the information you want -- quickly and easily.

Give yourself the freedom of expression with Report Writer -- from Samco of course.

---

## Features & Benefits

■ *Generate custom reports*

■ *Access up to 5 files concurrently*

■ *Exports data for use for database, spreadsheet, and other third party applications*

■ *Easy to use*

■ Provides a bridge between Samco files and popular spreadsheet, database, word processing and graphics packages.

■ Creation of reports is simplified with menus and step-by-step prompting.

■ Existing reports produced by Report Writer can be modified or used to create new report.

■ Twenty columns can be used on each report and up to five files accessed for information.

■ Special formatting features for dates, social insurance numbers, and dollar amounts included.

■ Calculations can be performed, and the results printed.

---

## Integration

Report Writer works with the data files from most Power Accounting modules.
